EDUCATION

Stony Brook University

Bachelor of Science in Computer Science

Relevant Coursework: Calculus I & II, Software and Analysis I, Discrete Structures

GPA: 3.84/4.0

Stony Brook, NY

Expected December 2028

EXPERIENCE

RFCUNY

Software Engineer Intern

New York, NY

March 2026 – May 2026

- Delivered a modernized full-stack rebuild of Blackfacts.com/news as one of a 3-person team, owning both React.js front-end and Python back-end work across the project
- Built 15 reusable React.js UI components styled with SCSS, standardizing the interface across 3 pages
- Developed Python back-end services for article ingestion, transcription, translation, and classification, processing a database of over 1 million articles
- Designed and tested REST/JSON API endpoints and webhooks, reliably serving article data to the front-end
- Wrote unit and integration tests; contributed to CI/CD workflows via GitHub

Target Corporation

Front-of-Store Guest Advocate

Hicksville, NY

May 2023 – Present

- Delivered 70% of guest pick-up orders in under three minutes during high-volume shifts, meeting the store's service target
- Trained 15 new team members on register operation and order fulfillment, getting them shift-ready in 1 day
- Processed 75+ daily customer transactions on cash register and POS credit-card systems with zero till discrepancies

PROJECTS

Founder Follow-up Agent - Python, Azure Functions, Gmail API

- Automated a manual outreach-tracking workflow into a zero-touch daily process, as measured by eliminating all manual logging of sent emails and follow-ups, by building a Python agent that scans Gmail threads via the Gmail API, extracts contact and timestamp metadata, and persists state programmatically
- Delivered reliable unattended execution in the cloud, as measured by daily runs completing with the user's machine powered off at ~\$0 infra cost (within the Azure free grant), by deploying the service to serverless Azure Functions with a timer trigger and externalizing state to Azure Blob Storage
- Eliminated false "needs follow-up" flags, as measured by the system auto-resetting the 7-day reminder window whenever a thread is re-engaged, by designing reply detection that keys off the most recent sent message rather than a static send date
- Authenticated to Google APIs using OAuth 2.0 with refresh-token handling for unattended, headless cloud execution

Discord Bot - Python, Discord.py, Git

- Built a Python Discord bot used in 200+ communities for moderation, entertainment, and polling, verified by Discord

CERTIFICATION

Deep Learning Specialization - DeepLearning.AI (Coursera)

In Progress

EXTRACURRICULARS

Varsity Basketball for Hicksville High School

Hicksville, NY

- Shooting Guard / Small Forward

November 2023 – February 2024

SKILLS

Programming: C++, Python, Java, TypeScript, JavaScript

Frameworks & Libraries: React.js, FastAPI, Node.js, Discord.py

Technologies: GitHub, Git, REST APIs, OpenAPI/Swagger, LLM Integration, SCSS, Microsoft Azure

Spoken Languages: Punjabi (Native), English (Fluent)

INTERESTS

Basketball, Fitness, Video Games
